Engineered, Designed and Manufactured in the USA

Striking the right balance; tough, reliable, rugged.

Split-Top Grapple Rake

The attachment that started it all, the Split-Top grapple rake is designed for use on tractor front loaders as well as skid steers (without a cab door). Available in two widths, 62" and 77", these units feature two upper grapples working independent of each other, allowing the unit to retain uneven loads. The lower tines with their replaceable wear points allows the grapple to pick up brush, logs, orchard pruning, brush piles and other debris while leaving the dirt behind — letting the operator get more work done.

- Unique tine design with weld-on tine points.
- Tine design allows operator to go under logs/brush for easy clean pick up.
- Interfacing quick-attach brackets available for most tractor loader models including John Deere, AGCO, CNH, Bush Hog and others.
- Greaseable pivot points on upper clamps for long service life.
- Shield plate in upper clamps provides protection to hydraulic cylinders.

Compact Grapple Rake

Designed for compact tractors up to 50 horsepower that are equipped with a front loader. This 60-inch wide grapple allows the acreage owner unsurpassed versatility in clearing brush, piling limbs or orchard maintenance. Ideal for loading limbs, orchard prunings, piling brush and other hard to handle materials.

- Unique upper grapple design of 3/8" steel provides clamping force to hold material securely.
- Design allows brush and other materials to be picked up while leaving the dirt.
- Size compatible with the lift capacity of most small loader tractors.
- Lower tines of 5/8" steel feature weld-on tine points, for easy, clean debris pick-up.
- Pivot points have lubrication capabilities.
- Tractor remote hydraulic ports are required to operate the grapple.
- Tractor front loader model allows use of standard pin-on bracket or select interfacing quick attach brackets for John Deere, AGCO, CNH, Kubota and other brands.

Choose WORKSAVER For All Your Material Handling

Low Profile Scrap Bucket

Designed for skid steers, the LPSB series scrap bucket provides material handling on the construction site for moving demolition debris, rocks, brush, and dirt. Ideal for storm clean-up, landscaping, or moving hard to handle materials. Features 3,000 psi cylinders with cylinder guards to protect the cylinders and components. Through the tube hose routing provides hose protection. In addition, hose routing down the left-hand back of the bucket results in maximum dump and roll back as optimum hose length is maintained. Hose routing can be reversed to right-hand side for JCB models. Flat-face couplers are standard. The scrap bucket's cutting edge is drilled to accept an optional replaceable and reversible beveled cutting edge which provides increased bucket strength while extending bucket life.

Low Profile Tine Grapple

Designed for skid steers, the LPTG series tine grapple easily moves rocks, brush, wood, metal and other materials while leaving the dirt on the ground. The grapple is ideal for various applications including construction site demolition and clean-up, storm clean-up, and landscaping. Features include 5" tine spacing, 3,000 psi cylinders with cylinder guards to protect the cylinders and components. Hoses are routed through the tube to provide hose protection. In addition hose routing down the left hand back of the bucket results in maximum dump and roll back as optimum hose length is maintained. Flat-face couplers are standard.

Skid Steer Brush Grapple

Designed for Skid Steer loaders, the SSGR-84 features a lower profile design than standard brush grapples making access to the operator's seat easy, even on units with a cab door. Lower tines with gripping notches of 1" material with weld-on tine points allow the grapple to pick-up debris while leaving the dirt behind. The dual upper grapples open a full 59-inches allowing the operator to maximize the amount of debris held.

Two 2" x 10", 3000 psi cylinders are mounted behind the mainframe to operate the upper grapples, while protecting them from harm. Hoses are routed through the mainframe providing protection for them.

- Lower profile provides easy access to the operator's seat, even on units with a cab door.
- Lower tines have weld-on tine points, allowing operator to go under logs/brush for easy clean pick-up.
- Gripping notches in upper grapple and lower tines help to retain materials in the grapple rake.
- Pivot points have lubrication capabilities for long service life.

SATG / SASB® Sweep Action Grapples

One Tool; many applications, best describes the Sweep Action Tine and Solid bottom construction grapples. The patent pending design keeps the front rake of the sweep clamp open during use until the rear section of the clamp is either closed or contacts the material being handled. The cylinder then overcomes the spring pressure causing the front rake to rotate towards the bucket in a sweeping motion moving material in and retaining it in the bucket.

The upper sweep-in clamps are 21-inches in width with solid steel front for added strength, as well as material control. They are raised, lowered, and closed by 2" x 8" 3,000 psi cylinders.

SATG-series with its open tine bottom (5-inch spacing) offers the performance that is demanded for clearing site demolition debris as well as rocks, brush, wood and metal.

SASB-series features our scrap yard tested solid bottom low-profile bucket. The bucket bottom is made from abrasion resistant steel with three 1/2" x 4" reinforcing wear strips for longer bucket life. The bucket cutting edge is pre-drilled to accept the optional bolt-on beveled (reversible) cutting edge, increasing the durability of the bucket edge.

ETG Series Tine Grapples

These tough, reliable and economical grapples offer models with skid steer style hook-up, John Deere 400/500 hook-up as well as a model for Euro/Global hook-up. Select models offer dual upper clamps for additional clamping. These grapples are ideal for raking, piling, and loading brush and other hard to handle materials while leaving the dirt behind.

- Unique upper grapple design on single clamp units provides clamping force to hold material securely.
- Recommended power unit size 30-55 hp.
- Greaseable pivot points on upper grapple(s) for long service life.
- Low profile design offers great forward visibility.
- Shield plate on upper grapple provides protection for hydraulic cylinder(s).
- Hoses are routed through the tube to provide hose protection on the ETG-26 models.
- ETG-26 with dual upper grapples for additional clamping is offered with Skid Steer mount, Euro/Global mount and John Deere 400/500 mount.

Compact Tractor Tine Grapple

Small size, big versatility the CTMG 48-inch grapple for compact tractors up to 38-hp handles limbs, prunings, debris and so much more. Single upper grapple of 3/8" steel is 31" wide with CNC cut gripping notches cut into the tines to help retain brush and other loose materials. 48-inch lower rake is made from 1/2" steel also featuring gripping notches to help retain loose materials. Heavy-wall tubing runs through the lower tines with gussets placed at each point of contact for added strength. Two models are available, CTMG-48S for those loaders with the skid steer type mount, and CTMG-48JD for those loaders that use the John Deere hook & pin type quick attach mount (200X, 200CX, D120, D160, H120, H130, H160). Both units feature standard parking stand for easy storage & parking of the unit on a hard flat surface.

- Sized to allow use on compact tractors up to 38-hp.
- Upper grapple, lower tines have gripping notches to help retain loose materials.
- Greaseable pivot points for long service life.
- Shipped less hoses & fittings, allowing the dealer to correctly match the hose length to the tractor / loader.
- Tractor remote hydraulic ports are required to operate the grapple.

Sub-Compact Tractor Mini Tine Grapple

Simplicity with strength and capacity best describes our Sub-Compact Mini Tine Grapples. Engineered for sub-compact tractors (up to 32-hp) equipped with a loader to handle debris and so much more — the SCG-48S & SCG-48JD are changing the way properties owners are cleaning up. This 48-inch wide grapple with either "universal" skid steer hook-up or John Deere Series hook up offers the operator the ability to own a job matched tool to collect debris, firewood, brush or orchard prunings, resulting in time savings and low cost of ownership. Fabricated from 3/8" steel these grapples have the strength with minimum weight to allow the owner to maximize the lift capacity of the loader.

- Upper grapple, lower tines have CNC gripping notches cut into them to help secure material.
- Single upper grapple is 28" wide.
- Parking stand to assist storage and hook-up.
- Durable square tubing provides strength to lower tines.
- 33-inch grapple opening for ease of gathering materials.
- 1.5" x 8" cylinder for upper clamp is job matched.

Choose WORKSAVER For All Your Material Handling

Electric Sub-Compact Grapple

No auxiliary hydraulics to operate the clamp on a grapple? No problem with WorkSaver's (patent applied for) Electric Sub-Compact Grapple. All you need is a connection to the battery. Engineered for Sub-Compact tractors (up to 32-hp) with a loader to handle debris & so much more. The ESCG-48S and ESCG-48JD are opening up possibilities never before available to large and small property owners. **Now that's the perfect attachment for your tractor!**

- 12-volt linear actuator with 8-inch stroke operates the grapple clamp
- Includes wiring harness for direct connection to the tractors' battery
- Pre-wired rocker switch controls the grapples' linear actuator
- Designed for sub-compact tractors up to 32 horsepower

12-volt industrial actuator with 8-inch stroke, slip clutch protected for dependable operation.

Rocker switch allows the operator to control grapple movement with the touch of a finger.

Heavy Duty power connectors with soft shell boot protector are standard.

The Grapple Rake is designed for handling loose logs, trees, stumps, brush, or other loose material. It is not designed for bulldozing. The rake frame is not designed to bulldoze out stumps or buried rocks. DO NOT turn when tines are in ground. To prevent damage to the grapple clamp arm, DO NOT use the grapple clamp to push or lift trees, logs, or stumps. DO NOT use the grapple clamp arm to rake or pull material back. The grapple clamp is designed for holding material against the rake main frame for handling only. It is NOT built for pushing, pulling, raking, or lifting heavy objects.

WARNING: Read and understand the operator's manual before operation. Be sure tractor/skid steer is properly counterbalanced. Damage to equipment or personal injury could occur.

Trailer Movers

The right tool makes all the difference. Two models of trailer movers are available to assist with moving and spotting standard ball type equipment. A 2" receiver tube with 5/8" hitch pin hole accepts a standard 2" mount which must be purchased separately. Models are available for Mini Skid Steer and Standard Skid Steer.

Trailer Movers Specifications

PRODUCT NO.	DESCRIPTION
812440	Trailer Mover for Standard Skid Steers, universal skid steer mount. Features 2" receiver tube with 5/8" hitch pin hole. Maximum tongue weight / vertical lift capacity 2,500 lbs. Hitch Ball Mount not included.
812445	Mini Skid Steer Trailer Mover. Ideal for spotting equipment in tight area or moving around the yard. Universal mini mount, fits Toro-Dingo, Boxer, Ditch Witch, Ramrod (will not fit Bobcat MT, Kanga, Prodigy, ASV) Hitch Ball Mount not included.

Skid Steer Crane Boom

The SSTB-3500 Crane Boom is ideal for lifting or moving objects such as balled trees, bundles of materials, or equipment on the job site. Features three lifting points for increased flexibility in loading and lifting. All welded steel construction for long life. Boom is 3" square tube stock providing strength and durability.

Skid Steer Crane Boom Specifications

SSTB-3500	
Lifting Capacity at Farthest Attaching Point (lbs/kg)	3200 / 1451
Lifting Capacity at Middle Attaching Point (lbs/kg)	3500 / 1587
Lifting Capacity at Closest Attaching Point (lbs/kg)	3700 / 1678
Overall Boom Length (in/mm)	59.25 / 1505
Boom Construction	3" Square Steel Tubing
Mounting Type	"Universal" Skid Steer
Weight (lbs/kg)	182 / 83
Product Item No.	811140

WARNING: Read and understand the operator's manual before operation. Be sure tractor/skid steer is properly counterbalanced. Damage to equipment or personal injury could occur.

SARG® Sweep Action Rock Grapple

Handles rocks and so much more, this is not just another grapple. It is the best grapple you will ever own. Revolutionizing the way rock grapples work, the SARG® (Sweep Action Rock Grapple) from WorkSaver makes life easier. With its patented design, the SARG allows the operator to sort large or small rocks and handle almost all kinds of debris, resulting in low cost of ownership.

The front hydraulically controlled grapples with their spring and hinge design operates with a sweeping action to pull rocks and debris into the unit. The springs hold the front sweep rakes open until the rear part of the grapple is down. Then the front rakes pull the material into the bucket. Grapple design retains the rocks or debris, allowing the operator to pivot the attachment to sift loose dirt out. Through the tube hose routing provides protection for the hoses, and flat-face couplers make hook up a breeze. Rocks, brush, logs, stumps, debris or scrap, the SARG handles them all.

See the SARG in action on YouTube!
(https://www.youtube.com/watch?v=q3TpOq7O_Ug)

Worksaver is taking a different approach to material handling needs.

(Right) Bolt-on side plates hold smaller rocks in the bucket. They can be removed from the bucket to allow the SARG to handle logs and stumps.

SARG® Sweep Action Rock Grapple – for Mini Skid Steer

Rocks are no problem...the 42-inch Sweep Action Rock Grapple with its 39-inch wide upper grapple sweeps rocks into the tine bucket and retains them there. The bucket features tines of solid 1" material spaced on 3" centers to retain rocks while allowing the dirt to be sifted out.

- Universal mini skid steer mount – fits Toro-Dingo, Boxer, Ditch Witch, Ramrod, Vermeer and others, SARG-42B/G fits Bobcat MT & Gehl 1640E.
- Single sweep action grapple to pull rocks & debris into the bucket.
- Hoses and flat-face couplers are standard equipment.
- Bolt-on side plates are standard to help retain smaller rocks if needed.
- Optional bolt-in solid bottom available to retain smaller materials.

Mini Skid Steer/Compact Tool Carrier Grapple

This tool consistently delivers high performance while offering the owner a great return on investment. Model MGU-48 is designed to fit any unit with the "Universal Mini Mount" (Toro-Dingo, Boxer, Ditch Witch, Ramrod, etc.). Model MGB/G-48 is designed to fit the Bobcat MT-Series as well as the Gehl 1640E. Overall unit width is 48". Offers great versatility in clearing brush, piling limbs, orchard prunings or other hard to handle materials.

- Single upper grapple provides clamping force to hold material securely.
- Mainframe design allows brush and other materials to be picked up while leaving the dirt.
- Good forward visibility for easy control in close quarters for increased productivity.
- Hoses and couplers are standard equipment.

Pallet Forks

Designed for skid steer or tractor front loaders, our standard pallet forks have rated capacities from 4,000 to 5,500 lbs. All models feature solid steel alloy forks for long life, with spring loaded latches for easy adjustment spacing.

- Skid steer pallet forks are offered with a one piece backstop or a step through design for easy cab access and excellent visibility.
- Available with 42", 48" or 60" long forks depending on model.
- Premium forks include spring loaded latches for easy adjustment spacing.
- Models also available with integrated brackets for skid steers, John Deere 400/500/600/700 series loaders, and loaders with Euro/Global attaching method.
- Optional interfacing quick-attach brackets are available for the model PF-448 for most popular loader models.
- Machined rails allow ease of fork spacing adjustment.

Choose **WORKSAVER** For All Your Material Handling

Compact Pallet Forks

Don't let their small size fool you. These pallet forks are designed for compact tractors up to 50 horsepower equipped with a front loader. Excellent for moving bulky, bagged or palletized materials quickly and easily, saving time and effort.

- Pallet forks are rated at 2,400 lbs.
- Models available with integrated brackets for John Deere 200/300 series loaders, as well as loaders utilizing the universal skid steer system.

Sub-Compact Pallet Forks

Value performance best describes these sub-compact pallet forks. Models for loaders with skid steer or John Deere quick attach on Sub-Compact tractors up to 35 hp.

- Rated at 1,250 lbs.
- Class I solid alloy steel forks, 36-inches or 42-inches in length depending on model.
- JDPF-1242 & SSPF-1242 features Class I forks 1.18" x 3" x 42".
- Skid Steer "Universal" and John Deere hook & pin style mounts available.
- Spring loaded latches for easy adjustment spacing.

Mini Skid Steer Pallet Forks

Pallet Forks designed for Mini Skid Steers / Compact Tool Carriers.

- Rated at either 1,200 lbs. or 2,000 lbs.
- All models utilizes Class I solid steel alloy forks.
- Fits Toro-Dingo, Ramrod, Boxer, Ditch Witch and others with "Universal" mounting system.
- Model available for Bobcat MT-series (MT-50, MT-52, MT-55).

Clamp-On Bucket Forks

These Clamp-On Bucket Forks are built to meet the demands of today's acreage owner. Easy on/off design offers the utmost in convenience when moving palletized materials.

- Designed for handling palletized material only.
- Useable fork length of 35 or 42 inches, depending on model.
- Forks extend 14.5 Inches under bucket, 8 in. inside bucket.
- Completely independent – allows fork adjustment to any pallet width.
- Mounts to most loader buckets without the use of tools – easy on/off design.
- Rated from 1,000 to 4,000 lbs. Lift is limited by fork capacity or loader capacity, whichever is less.
- Each fork has a built-in stake pocket for a 2 x 4 to be installed as an upright backstop (recommended).

About Worksaver

With a history dating back to the 1950s, today, Worksaver continues on a path of growth and innovation aided by the latest in computer designed products and components, increased manufacturing efficiencies and a commitment to quality.

With CNC machining centers, fiber laser shape cutting, robotic welders and polyurethane paint you can be assured that we will consistently deliver high quality industry-leading products that elevate your productivity.

Our Midwest location offers us the ability to service all areas of the country easily. With a skilled work force that shares the same values as our customers. They share in your passion for well-made quality products.

Our #1 goal is to provide our customers with products they are proud to own and help them get more done.

**Worksafer,
The Logical Choice
in Equipment.**

Caution — A heavy load can cause your power unit to tip over. When moving heavy loads, keep the load as close to the ground as possible, go slowly around turns, and be sure the front or rear of power unit is properly counterbalanced with weights.

Caution — Operators must read & understand operator's manual, particularly the safety warnings and instructions. **The operator is responsible for safety of themselves and others when operating equipment.**

WORKSAVER, INC. has a corporate policy of continuous product improvement and development; therefore, specifications are subject to change without any advance notice.
