

PRODUCT WALKTHROUGH

BULLDOZER BLADES

What is Quick Attach D-Lock Mounting?

The D-Lock® mounting system offers the convenience of quick attach/detach as well as long life. No tools are required. Fit-ups are 100% secure with zero movement. The blade can be removed in minutes by disengaging two points on the front axle brackets.

Step 1: Remove clip pin. Insert handle in slot 1.

Step 2: Rotate to position 1

Step 3: Remove handle. Re-insert in slot 2

Step 4: Rotate up to position 2. Remove handle & Store. Re-install clip pin.

What is HQT (Hydraulic Quick-Tach)?

In the spirit of safety and simplicity, Degelman has pushed the design process one more time by coming up with the all new HQT-Hydraulic Quick Tach System. This precision built feature utilizes a hydraulic pin engagement concept which allows the operator to secure the blade to the Dozer mounting framework from the tractor seat. It avoids the dangers, awkwardness and hassles of crawling around the tractor to secure the dozer engagement. Just one more example of how Degelman pushes design to make things a little safer, more convenient and last longer.

SILAGE KING

APPROACH ANGLE

Hydraulic Lift, Angle, Tilt

It's Good to be King

The Silage King is built on the same rock-solid foundation that Degelman is known for, and includes features that will significantly improve how you push silage. With our new streamlined design, this blade pushes silage with less horsepower, while maximizing the approach angle - allowing you to push the silage up where it belongs.

Designed for Silage

The Silage King with silage extension comes in at 75" tall - the tallest dozer blade in the industry. The curvature has been slightly flattened out from the 7900 in order to prevent the blade from holding on to excess material, allowing for even distribution. With more height, and less curvature, you can push more silage with less horsepower.

Reduced Overhang for Better Control

In order to give the operator more control, we've moved the blade 19" closer to the tractor. This reduced overhang improves control while keeping the blade at the ideal approach angle to the silage pile.

Degelman's Radial Lift Approach

When an adjustment needs to be made by the operator, fast blade response time is necessary. The Degelman Silage King is mounted with only one pivot point, making the response time as quick as possible. This radial lift design makes it easier to push, carrying loads **UP** the pile, rather than **INTO** the pile.

USE OUR BUILD A BLADE FEATURE TO QUICKLY FIND THE RIGHT FIT-UP FOR YOUR TRACTOR

With over 450 different combinations of tractor manufacturers and blades available, the Degelman build-a-blade tool is an easy and efficient way to find which blade is right for your tractor. Follow the steps below to build yours today.

1. Visit Degelman.com
2. Click on "Build & Price"
3. Click on "Bulldozer Blades"
4. Choose your tractor
5. Select your blade
6. Choose width, options, and accessories
7. Save your build ID to view this build again
8. As you scroll, you will see mounting times, part numbers, and prices.
9. You can print, save, and email the selected blade, as well as view the total price and photos of the selected blade.
