

GREENSCAPE 750

FOOD PLOTTER

The Greenscape 750 FOOD PLOTTER No-Till Drill is the latest in the Greenscape family of the most reliable seeders produced in the US over the past 20 years. High precision seed boxes and flow control make seeding a breeze with the ability to drill many different varieties and sizes of seed into all types of planting conditions.

Heavy built, but constructed to be able to be handled by tractors as low as 50 HP, The FOODPLOTTER is designed for planting deer food plots around woodlands or high precision pasture seeding in the fall.

The 10 coulters at 7 ¹/₂" High precision large seed seedcups accurately drop seeds into the openings. A separate Legume Seedbox with high precision seed cups accurately drop seed along a "splash pan" that rains the small seed over the soil. A packer roller system with Nylon rings or optional cast iron rollers help press the seed into the ground and close up the cuts made by the disc openers.
